

VICTOR DIAZ DE LEON

Long Beach, CA — (909) 373-5791 — vrdiazdel@gmail.com

PROFESSIONAL SUMMARY

Experienced Front-End Software Engineer passionate about crafting high-performance, user-centric web applications. Proficient in JavaScript/TypeScript, React, and NextJS, with a strong focus on responsive design and delivering exceptional user experiences.

EDUCATION

Bachelor of Arts in Philosophy - University of California, Irvine

June 2013

RELEVANT EXPERIENCE

Skool

September 2023 — January 2025

Full-Stack Software Engineer

- Worked with a small agile team to improve the performance and web vital metrics across the Skool app using NextJS
- Worked with the frontend team to migrate the Skool NextJS app from Javascript to Typescript, along with the Storybook and Jest unit testing setups
- Deprecated the use of the Material UI library across the entire codebase and built a custom UI component library as its replacement
- Worked closely with Product, Customer Support, Quality Assurance, Frontend, and Backend teams and implemented new full-stack features using NextJS, React, Go, Postgres, and Redis
- Created database migrations and added new functionality to Skool's backend services using Go, Postgres, and Redis

Coinbase

August 2021 — August 2023

Software Engineer IV

- Worked with a small agile team on assethub.coinbase.com to allow users to easily add and manage assets on the Coinbase platform using Typescript, React, and Go
- Worked closely with the Legal/Listings teams on an internal Asset Hub Admin app to streamline the asset review and asset application processes using Typescript, React, and Go
- Mentored and worked with an intern to build the Asset Lifecycle Manager internal tool to automate the asset launch process using Typescript, React, GraphQL/Apollo, and Go

- Worked closely with the Asset Addition team to improve the asset addition process and add new assets to the Coinbase platform using Go and Ruby/Rails
- Implemented the new Retail Staking UI flow on coinbase.com and the Coinbase mobile app using Typescript, React, React Native, GraphQL/Relay, and Go
- Worked closely with institutional clients and stakeholders to implement the stake, unstake, and deposit/transfer UIs for prime.coinbase.com using Typescript, React, and GraphQL/Relay

Weedmaps

April 2019 — July 2021

Front End Engineer III

- Built highly performant and scalable e-commerce solutions for weedmaps.com using NextJS, React, Elixir, and GraphQL
- Worked closely with Back End engineers to architect and build the existing promo code and guest checkout experiences on weedmaps.com

Freelance

April 2018 — July 2021

- Worked directly with clients to create custom websites, Wordpress sites, and Shopify sites

Mopro

August 2016 — April 2019

Lead Front End Developer

Pixel Motion

May 2015 — August 2016

Web Developer

RELEVANT SKILLS
